### Tee Sign Advertising

Signs are made from HDPE(High Density Polyethylene) The Material is 1/2" thick. The information is routed into the material revealing the inner color.

The Tee Sign with hole info is 21"x28"

The advertiser sign is 21"x8". The actual useable space is ~19.6"x6.6". The information going on the sign can be done in three ways.

1. Simple verbiage like example #1. 2 or 3 lines of text.
2. With a poured logo like example #2. A colored resin is poured into the routed areas. The rest of the verbiage is simple text.
3. With a laminated vinyl logo. Complicated logos that cannot be routed will require a vinyl decal. It will be recessed into the sign.

#### Artwork requirements for logos:

Vector art is preferred. This is native or originally drawn logos. They would be eps, ai or possibly pdf files. If this type of artwork is not available than a high resolution jpg or tif file is acceptable. Please do not create your own pdf files or word files. They will not work.

Any artwork questions can be emailed to Peter Meyer. His email address is [peter@nationalgolfgraphics.com](mailto:peter@nationalgolfgraphics.com).

Proofs will be provided for your approval.
